SUMMARY

Software Engineer specializing in backend development and mobile applications. Currently a Junior Java Developer at eConceptions, building microservices and REST/SOAP APIs with Spring, Groovy, and Grails. Hands-on experience delivering cross-platform mobile applications. Passionate about transitioning into AI solutions, clean architecture, scalable systems, and delivering reliable software across the stack

EXPERIENCE

Junior Java Developer

eConceptions (Pakistan)

Jul 2025 – Present

Islamabad, Pakistan

- Build and maintain backend microservices with SOAP/REST API integration using Java, Spring, Groovy & Grails.
- Collaborate with cross-functional teams to align backend architecture with mobile frontend workflows.
- Improved system reliability through modular service design and refactoring of legacy code.

Mobile Development Intern

Pakistan Ordnance Factories (POF)

Summer 2024

Wah Cantt, Pakistan

- Led a 3-person team to build a cross-platform internal mobile app with cloud backend; delivered in 6 weeks.
- Conducted regular team reviews and practiced structured task breakdown for timely delivery.
- Certificate: POF-Internship

TECHNICAL SKILLS

Backend: Java, Spring, Groovy, Grails, REST/SOAP APIs, Python, PHP (Laravel), MySQL

Mobile & Web: Dart, Firebase, Supabase, HTML/CSS

Tools: Git, VS Code, Android Studio, Postman, Figma, Visio

Other: UML Diagrams, Wireframing, SRS | English (Fluent), Urdu (Native)

PROJECTS

ArticuliCare – AI Articulation Disorder Detection App (FYP)

Oct 2024 – May 2025

- AI-powered mobile app using Firebase, TFLite & Supabase for real-time on-device speech analysis.

Loan Approval Prediction App

Dec 2024

- ML-based prediction app built with Streamlit and integrated with Google Colab for model training.

ChatMate – AI Chatbot

Jun 2024

- Smart chatbot using Botpress with real-time analytics and natural language interaction support.

Dripit Store UI Screens – HCI Project

May 2024

- Designed high-fidelity UI screens in Figma focusing on accessibility, responsive layout, and user flow.

Gaming Accessories E-commerce Site

Oct 2023

- Full-stack Laravel e-commerce platform with admin panel, cart, and checkout functionality.

Banking Management Desktop App

Mar 2022

- Java desktop app with user authentication and transaction history modules using NetBeans.

EDUCATION

B.S. Software Engineering – CGPA: 3.52

COMSATS University Islamabad, Wah Campus

2021 – 2025

Wah Cantt, Pakistan

- **Final Year Project:** ArticuliCare – AI-powered mobile app for articulation disorder detection using Firebase, Supabase & TFLite.
- **Courses:** Mobile App Development, Software Engineering, Databases, AI Fundamentals
