SUMMARY

Software Engineer specializing in backend development and mobile applications. Currently a Junior Java Developer at eConceptions, building microservices and REST/SOAP APIs with Spring boot, Groovy and Grails. Hands-on experience delivering cross-platform mobile applications. Passionate about transitioning into AI solutions, machine learning, big data, clean architecture, scalable systems, and delivering reliable software across the stack

EXPERIENCE

Junior Java Developer

eConceptions (Pakistan)

Jul 2025 – Present

Islamabad, Pakistan

- Build and maintain backend microservices with SOAP/REST API integration using Java, Spring, Groovy & Grails.
- Collaborate with cross-functional teams to align backend architecture with mobile frontend workflows.
- Improved system reliability through modular service design and refactoring of legacy code.

Mobile Development Intern

Pakistan Ordnance Factories (POF)

Summer 2024

Wah Cantt, Pakistan

- Led a 3-person team to build a cross-platform internal mobile app with cloud backend; delivered in 6 weeks.
- Conducted regular team reviews and practiced structured task breakdown for timely delivery.
- Certificate: POF-Internship

TECHNICAL SKILLS

Backend: Java, Groovy, Grails, REST/SOAP APIs, Python, MySQL

Mobile & Web: Dart, Firebase, Supabase, HTML/CSS

Data & AI: Machine Learning, Big Data, Supervised Learning, K-Means Clustering

Tools: Git, VS Code, Android Studio, Postman, Figma, Visio

Other: UML Diagrams, Wireframing, SRS | English (Fluent), Urdu (Native)

CERTIFICATIONS

Machine Learning with Python – IBM

Aug 2026

- Skills: Supervised Learning, K-Means Clustering, Model Evaluation.

Big Data 101 – Cognitive Class / IBM

Jul 2026

- Foundational concepts in big data systems, distributed data processing, and data handling at scale.

Artificial Intelligence Fundamentals – IBM SkillsBuild

Jul 2026

- Core AI concepts including machine learning fundamentals, neural networks, and AI use cases.

PROJECTS

ArticuliCare – AI Articulation Disorder Detection App (FYP)

Oct 2024 – May 2025

- AI-powered mobile app using Firebase, TFLite & Supabase for real-time on-device speech analysis.

Loan Approval Prediction App

Dec 2024

- ML-based prediction app built with Streamlit and integrated with Google Colab for model training.

ChatMate – AI Chatbot

Jun 2024

- Smart chatbot using Botpress with real-time analytics and natural language interaction support.

Dripit Store UI Screens – HCI Project

May 2024

- Designed high-fidelity UI screens in Figma focusing on accessibility, responsive layout, and user flow.

Gaming Accessories E-commerce Site

Oct 2023

- Full-stack Laravel e-commerce platform with admin panel, cart, and checkout functionality.

Banking Management Desktop App

Mar 2022

- Java desktop app with user authentication and transaction history modules using NetBeans.

EDUCATION

B.S. Software Engineering – CGPA: 3.52

2021 – 2025

COMSATS University Islamabad, Wah Campus

Wah Cantt, Pakistan

- **Final Year Project:** ArticuliCare – AI-powered mobile app for articulation disorder detection using Firebase, Supabase & TFLite.
- **Courses:** Software Engineering, Machine Learning, Database Systems, Artificial Intelligence
